Back-end	Rails, Django, NestJs, NodeJs, ExpressJs
Front-end	React, NextJs, HTML, CSS, Material UI, Lodash
Database	PostgreSQL, SQL
DevOps	AWS, Docker
Tools	Periscope, MixPanel, DataDog
AI	Claude Code, Cursor, Github Copilot
Testing	Rspec, Jest
Language	Vietnamese, English

Experience

Employment Hero

Ho Chi Minh City, Vietnam

SOFTWARE ENGINEER

Dec. 2025 - Now

- **Reward: Winner of the 2024 "Rookie of the Year" award for outstanding newcomer.**
- **Project: Hero Clear — Clearing House Service (Dec. 2025 - Present)**
 - Built and scaled Hero Clear, a high-volume superannuation payment service processing millions of dollars and millions of events daily, with over \$1 billion processed as of September 2026.
 - Designed robust handling for concurrent webhook events, preventing race conditions and ensuring consistent transaction and data states.
 - Built an anomaly detection system to identify unusual patterns and proactively detect potential fraud, data inconsistencies, and abnormal system behavior.
 - Designed and implemented a state machine to enforce valid state transitions and prevent invalid or inconsistent data changes.
 - Develop comprehensive unit and end-to-end tests to ensure reliability and seamless integration across services.
 - Write solution document for complex tasks with Confluence.
 - Utilize AI tool such as Claude Code, Cursor or Github Copilot to improve development speed.
 - Collaborated with various teams in Vietnam, UK, South East Asia, and Australia.
 - Technologies used: Ruby on Rails, SQL, DataDog, Periscope, AWS.
- **Project: Superfund Service (Jan. 2024 - Dec. 2025)**
 - Lead the development of new features for many important services in both Frontend and Backend that greatly affect product revenue.
 - Identify and resolve long-standing hidden issues in the system, including security vulnerabilities, critical workflow bugs, and more.
 - Improve system performance by using Multi-threading, caching and bulk-actions.
 - Increase frontend development speed by at least 2 times by introducing a workflow that supports hot reloading of embedded components directly on partner websites, removing the need to wait for a full JavaScript bundle build before previewing changes.
 - Write unit tests for both Frontend and Backend to ensure system reliability.
 - Write SQL queries to generate reports for various internal purposes, including analysis, revenue reports, performance, and more.
 - Technologies used: Ruby on Rails, Node.Js, React.Js, Javascript, SQL, DataDog, MixPanel, Periscope, AWS.

Kite Metric

SOFTWARE ENGINEER

Ho Chi Minh City, Vietnam

Apr. 2022 - Jan. 2024

- Developed new features for the Frontend and Backend of a coaching system designed to help people land a job.
- Implemented a payment gateway for use in Shopify and standalone stores.
- Collaborated with various teams using Notion for technical documentation.
- Technologies used: Python, Node.Js, React.Js, Next.Js, Django, Express.Js Node.Js, Chakra UI,...

Phenikaa MaaS

BACKEND ENGINEER

Ho Chi Minh City, Vietnam

Jun. 2021 - Mar. 2022

- Recognized as one of the most talented personnel in the company in 2021.
- Developed new features for a school management system that facilitates communication between teachers, students, and parents.
- Developed and maintained APIs and Portals for the Timekeeping module (MaaS Connect) used in companies and schools.
- Developed data importing/exporting features for both Frontend and Backend of the Bus Management System.
- Technologies used: Golang, PostgreSQL, Qor, Gin, Node.Js, Angular.Js, Restify, Material UI,...

Certifications

- Jun. 2023** AWS Certified Solutions Architect – Associate
- Jun. 2022** Upwork Skill Certification - Javascript Back-end Development
- Sep. 2022** TOEIC 780/990
- Sep. 2022** TOEIC SW 310/400
